What the agent is trying to do
Unblock partner by providing project status

Why it thinks this is appropriate
- Partner requested update
- No response after 2 hours
- Internal notes are available

Why this might be problematic
- Implies direction is finalized
- Includes internal rationale

Suggested actions
- Reframe as "in progress"
- Remove internal rationale
- Hold until direction is finalized

Message draft

We're discussing the API approach and will share a confirmed direction shortly.

What the agent is trying to do
Unblock partner by providing project status

Why it thinks this is appropriate
- Partner requested update
- No response after 2 hours
- Internal notes are available

Policy detail

Flag if internal rationale is included
Risk: Premature disclosure

Flag if internal alignment is unconfirmed
Risk: Misrepresentation

Flag if language is high certainty (we've decided, we will, etc.)
Risk: False commitment

Flag if response delay is more than 2 hours
Risk: Delayed response increases priority but not authority

Flag if external recipient
Risk: Unapproved messages could create confusion, cost money and reputation.

Conversation context

Partner (2h ago)
Any update on the integration approach? We need to plan next steps.

Internal note
Engineering leaning toward API approach, but still discussing alternatives.

Agent's draft message
We're discussing the API approach and will share a confirmed direction shortly.
